PROFILE

Founder-operator with 15+ years across sales, customer experience, ecommerce, operations and growth. I design AI agents and automation systems that connect customer conversations, sales, follow-up, ecommerce operations, CRM-style routing and executive reporting.

My strongest hands-on areas are business-process architecture, AI-agent orchestration, APIs, webhooks, n8n-level workflows, WhatsApp automation, Shopify/ecommerce operations, human handoff, retries, monitoring and operational state.

SELECTED SYSTEMS

LAURA - AI Commerce Operating System

Designed a conversational commerce system for WhatsApp sales, customer support, follow-up, order continuity, COD confirmation, post-purchase workflows and human escalation.

CAROLINA - AI Acquisition & Opportunity System

Designed an autonomous acquisition workflow for opportunity discovery, prospect research, fit scoring, personalized applications/proposals, inbox classification, follow-up, scheduling and evidence-based reporting.

Ecommerce Operations

Built operating logic connecting Shopify, order states, COD confirmation, logistics, customer support and post-sale workflows with clear traceability.

Meta Ads & Creative Intelligence

Designed systems for campaign reading, creative fatigue, hooks, angles, testing signals and decision support.

BUSINESS OPERATING EXPERIENCE

Founder & Operator - Professional Glam / Piel y Glamour

2018 - Present | Colombia / DTC

- Built and operated a haircare business across three physical locations plus national ecommerce.
- Managed teams, sales, customer experience, operations, logistics, marketing and retention.
- Shopify exports show 9,000+ orders and more than COP 1B in sales.
- Designed and implemented automation systems around customer communication, ecommerce operations and follow-up.
- Led Meta advertising and creative strategy across substantial paid-media spend.

Commercial / Marketing Leadership & Consulting

2009 - Present

- Commercial leadership, sales strategy, customer service, retention, training and growth consulting.
 - Coordinated teams of 35+ employees and broader cross-functional groups.
 - Delivered trainings and conferences for hundreds of participants.
 - Built funnels, offers, sales processes and positioning systems for businesses.
-

CORE CAPABILITIES

- AI agents and workflow orchestration
 - n8n / workflow automation
 - APIs and webhooks
 - WhatsApp automation
 - Shopify / ecommerce operations
 - CRM and lead-routing logic
 - Customer experience automation
 - Sales operations and follow-up systems
 - Human-in-the-loop design
 - Error handling, retries and monitoring
 - DTC growth and creative strategy
 - Business-process mapping
 - Prompt and system design
-

WORKING STYLE

I combine business context with implementation. I do not start with a tool; I start with the process, identify where time, money or context is being lost, then design the automation around the real operating workflow.

Available for remote contract, fractional or project-based work across LATAM and global teams.
